Index to Volume 3: Subject

Abdomen, surgery
Abdominal surgery- and trephination-induced delay in gastric emptying is prevented by intracisternal injection of CRF antagonist in the rat (Taché et al), 19

Abstracts
Abstracts of the 13th International Symposium on Gastrointestinal Motility, 169–209

Adenosine cyclic monophosphate
Change in intracellular cyclic nucleotide content accompanies relaxation of the isolated canine internal anal sphincter (Grous et al), 46

Adrenergic alpha receptor blockaders
Adrenergic control of interdigestive and digestive motility via the pyloric region (Holle et al), 131
Role of peptide YY in intestinal and gallbladder motility in dogs (Thor et al), 237

Adrenergic beta receptor agonists
Colonic and cardiovascular actions of the atypical β-adrenergic agonist SR 58611A in rats (Croci et al), 273

Afferent fibers. *See* **Neurons, afferent**

Alpha-adrenergic blockers. *See* **Adrenergic alpha receptor blockaders**

Anal sphincter. *See* **Anus**

Antibiotics
Response of the human gastrointestinal tract to erythromycin (Zara et al), 26

Anus
Change in intracellular cyclic nucleotide content accompanies relaxation of the isolated canine internal anal sphincter (Grous et al), 46
Effect of electrical anterior sacral nerve root stimulation on pelvic floor function in paraplegic subjects (Binnie et al), 39

Atropine
Regulation of gastric corpus tone by the vagus nerve in the ferret (Grundy et al), 32

Axons
Capsaicin-sensitive vagal afferent fibers and gastric motility: evidence for an "axon reflex" mechanism (Laird et al), 138

Barrier kinetics. *See* **Kinetics**

Beta-adrenergic agonist. *See* **Adrenergic beta receptor agonists**

Bile acids and salts
Activity fronts of migrating myoelectric complex: initiation by luminal bile acids in rat small intestine (Nilsson et al), 84
Migrating motor complex and the enterohepatic circulation of bile acids: a scintigraphic study using ^{75}Se-HCAT (Qvist et al), 1

Capsaicin
Capsaicin-sensitive vagal afferent fibers and gastric motility: evidence for an "axon reflex" mechanism (Laird et al), 138

Cardiac muscle. *See* **Heart**

Cardiovascular system
Colonic and cardiovascular actions of the atypical β-adrenergic agonist SR 58611A in rats (Croci et al), 273

Catheterization
Intraluminal multiple electric impedance procedure for measurement of gastrointestinal motility (Silny), 151

Cell-to-cell conduction. *See* **Neural conduction**

Cerebrovascular disorders
Esophageal manometry in patients with unilateral hemispheric cerebrovascular accidents or idiopathic Parkinsonism (Weber et al), 98

Cholecystokinin
Role of peptide YY in intestinal and gallbladder motility in dogs (Thor et al), 237

Cholesterol, dietary
Gastrointestinal electrical activity in the prairie dog during fasting, feeding, and after high-cholesterol diet (Calabuig and Moody), 117

Cisapride
Double-blind controlled trial on the effect of cisapride in the treatment of constipation in paraplegic patients (Badiali et al), 263
5-Hydroxytryptamine-mediated responses in myenteric neurons of the guinea pig gastric corpus: effect of ICS 205-930 and cisapride (Schemann), 255

Cold
Effect of cold stress on esophageal peristalsis in healthy humans during the postprandial period (Penagini et al), 163
Effects of cold stress on gastric myoelectric activity (Stern et al), 225

Colon
Colonic and cardiovascular actions of the atypical β-adrenergic agonist SR 58611A in rats (Croci et al), 273
Colonic motility and transit after intermesenteric nerve transection and mesenteric ganglionectomy in dogs (Brugère et al), 107
Rat colonic motor responses to inflammatory mediators in vitro: a poor model for the human colon (Percy et al), 229
Regional comparison of rat colon mechanics (Butt et al), 92
Stress and gastrointestinal motility in humans: a review of the literature (Holtmann and Enck), 245

Constipation
Double-blind controlled trial on the effect of cisapride in the treatment of constipation in paraplegic patients (Badiali et al), 263

Corticotropin-releasing factor
Abdominal surgery- and trephination-induced delay in gastric emptying is prevented by intracisternal injection of CRF antagonist in the rat (Taché et al), 19

CRF. *See* **Corticotropin-releasing factor**

Cyclic nucleotides. *See* **Nucleotides, cyclic**

Deglutition
Esophageal manometry in patients with unilateral hemispheric cerebrovascular accidents or idiopathic Parkinsonism (Weber et al), 98

Deglutition disorders
Esophageal motor patterns during episodes of dysphagia for solids (Howard et al), 123

Diabetes mellitus
Relationship between clinical factors and gastrointestinal dysmotility in diabetes mellitus (Kim et al), 268

Diet
Gastrointestinal electrical activity in the prairie dog during fasting, feeding, and after high-cholesterol diet (Calabuig and Moody), 117

Digestion
Adrenergic control of interdigestive and digestive motility via the pyloric region (Holle et al), 131

Dysphagia. *See* **Deglutition disorders**

Eating
Esophageal motor patterns during episodes of dysphagia for solids (Howard et al), 123
Electric impedance
Intraluminal multiple electric impedance procedure for measurement of gastrointestinal motility (Silny), 151
Electric stimulation
Effect of electrical anterior sacral nerve root stimulation on pelvic floor function in paraplegic subjects (Binnie et al), 39
Regulation of gastric corpus tone by the vagus nerve in the ferret (Grundy et al), 32
Electrical conductivity
Barrier kinetic mapping unit: application to ionic transport in gastric smooth muscle (Skinner and Bardakjian), 213
Cell-to-cell conduction across gap junctions can account for electrical syncytial properties of gastrointestinal muscle (Wood), 55 (Editorial)
Effects of cold stress on gastric myoelectric activity (Stern et al), 225
Electric field model: an alternative mechanism for cell-to-cell propagation in cardiac muscle and smooth muscle (Sperelakis), 64
Gastrointestinal electrical activity in the prairie dog during fasting, feeding, and after high-cholesterol diet (Calabuig and Moody), 117
Propagation of electrical activity in gastrointestinal smooth muscle: the case for propagation by local circuit current flow (Bortoff), 57
Electrogastrography
Effects of cold stress on gastric myoelectric activity (Stern et al), 225
Electromyography
Gastrointestinal electrical activity in the prairie dog during fasting, feeding, and after high-cholesterol diet (Calabuig and Moody), 117
Enterohepatic circulation
Migrating motor complex and the enterohepatic circulation of bile acids: a scintigraphic study using ^{75}Se-HCAT (Qvist et al), 1
Erythromycin
Response of the human gastrointestinal tract to erythromycin (Zara et al), 26
Esophagus
Effect of cold stress on esophageal peristalsis in healthy humans during the postprandial period (Penagini et al), 163
Esophageal manometry in patients with unilateral hemispheric cerebrovascular accidents or idiopathic Parkinsonism (Weber et al), 98
Esophageal motor patterns during episodes of dysphagia for solids (Howard et al), 123
Stress and gastrointestinal motility in humans: a review of the literature (Holtmann and Enck), 245

Fasting
Gastrointestinal electrical activity in the prairie dog during fasting, feeding, and after high-cholesterol diet (Calabuig and Moody), 117

Gallbladder
Role of peptide YY in intestinal and gallbladder motility in dogs (Thor et al), 237
Ganglionectomy
Colonic motility and transit after intermesenteric nerve transection and mesenteric ganglionectomy in dogs (Brugère et al), 107
Gap junctions
Cell-to-cell conduction across gap junctions can account for electrical syncytial properties of gastrointestinal muscle (Wood), 55 (Editorial)
Gastric corpus. *See* **Stomach**
Gastric emptying
Abdominal surgery- and trephination-induced delay in gastric emptying is prevented by intracisternal injection of CRF antagonist in the rat (Taché et al), 19
Gastric smooth muscle. *See* **Muscles, smooth**
Gastrointestinal tract, drug effects
Response of the human gastrointestinal tract to erythromycin (Zara et al), 26
Guanosine cyclic monophosphate
Change in intracellular cyclic nucleotide content accompanies relaxation of the isolated canine internal anal sphincter (Grous et al), 46

Heart
Electric field model: an alternative mechanism for cell-to-cell propagation in cardiac muscle and smooth muscle (Sperelakis), 64
Heart rate
Colonic and cardiovascular actions of the atypical β-adrenergic agonist SR 58611A in rats (Croci et al), 273
Histamine
Rat colonic motor responses to inflammatory mediators in vitro: a poor model for the human colon (Percy et al), 229
5-Hydroxytryptamine. *See* **Serotonin**

ICS 205-930
5-Hydroxytryptamine-mediated responses in myenteric neurons of the guinea pig gastric corpus: effect of ICS 205-930 and cisapride (Schemann), 255
Idiopathic Parkinsonism. *See* **Parkinson disease**
Inflammatory bowel diseases
Rat colonic motor responses to inflammatory mediators in vitro: a poor model for the human colon (Percy et al), 229
Interdigestion. *See* **Digestion**
Intermesenteric nerve. *See* **Mesenteric nerve**
Internal anal sphincter. *See* **Anus**
International Symposium on Gastrointestinal Motility
Abstracts of the 13th International Symposium on Gastrointestinal Motility, 169–209
Intestinal obstruction
Pseudo-obstruction syndrome in multiple sclerosis (Summers et al), 144
Intestine, large
Colonic motility and transit after intermesenteric nerve transection and mesenteric ganglionectomy in dogs (Brugère et al), 107
Stress and gastrointestinal motility in humans: a review of the literature (Holtmann and Enck), 245
Intestine, small
Activity fronts of migrating myoelectric complex: initiation by luminal bile acids in rat small intestine (Nilsson et al), 84
Stress and gastrointestinal motility in humans: a review of the literature (Holtmann and Enck), 245
Studies of small intestinal myoelectrical activity and intraluminal pressure changes in the unrestrained conscious rat (Arouni et al), 12

Intestines
Relationship between clinical factors and gastrointestinal dysmotility in diabetes mellitus (Kim et al), 268
Role of peptide YY in intestinal and gallbladder motility in dogs (Thor et al), 237
Intraluminal multiple electric impedance
Intraluminal multiple electric impedance procedure for measurement of gastrointestinal motility (Silny), 151
Intraluminal pressure
Studies of small intestinal myoelectrical activity and intraluminal pressure changes in the unrestrained conscious rat (Arouni et al), 12
Ionic channels
Barrier kinetic mapping unit: application to ionic transport in gastric smooth muscle (Skinner and Bardakjian), 213

Jejunum
Pseudo-obstruction syndrome in multiple sclerosis (Summers et al), 144

Kinetics
Barrier kinetic mapping unit: application to ionic transport in gastric smooth muscle (Skinner and Bardakjian), 213

Large intestine. *See* **Intestine, large**
Leukotrienes
Rat colonic motor responses to inflammatory mediators in vitro: a poor model for the human colon (Percy et al), 229
Local circuit current flow
Propagation of electrical activity in gastrointestinal smooth muscle: the case for propagation by local circuit current flow (Bortoff), 57
Luminal bile acids. *See* **Bile acids and salts**

Manometry
Esophageal manometry in patients with unilateral hemispheric cerebrovascular accidents or idiopathic Parkinsonism (Weber et al), 98
Esophageal motor patterns during episodes of dysphagia for solids (Howard et al), 123
Relationship between clinical factors and gastrointestinal dysmotility in diabetes mellitus (Kim et al), 268
Mesenteric nerve
Colonic motility and transit after intermesenteric nerve transection and mesenteric ganglionectomy in dogs (Brugère et al), 107
Mesentery
Colonic motility and transit after intermesenteric nerve transection and mesenteric ganglionectomy in dogs (Brugère et al), 107
Migrating motor complex. *See* **Myoelectric complex, migrating**
Multiple sclerosis
Pseudo-obstruction syndrome in multiple sclerosis (Summers et al), 144
Muscle contraction
Regional comparison of rat colon mechanics (Butt et al), 92
Muscle relaxation
Change in intracellular cyclic nucleotide content accompanies relaxation of the isolated canine internal anal sphincter (Grous et al), 46
Regional comparison of rat colon mechanics (Butt et al), 92
Muscles, smooth
Barrier kinetic mapping unit: application to ionic transport in gastric smooth muscle (Skinner and Bardakjian), 213
Cell-to-cell conduction across gap junctions can account for electrical syncytial properties of gastrointestinal muscle (Wood), 55 (Editorial)
Change in intracellular cyclic nucleotide content accompanies relaxation of the isolated canine internal anal sphincter (Grous et al), 46
Effects of neurotensin on gastric smooth muscle of dog and guinea pig (Mandrek and Milenov), 5
Electric field model: an alternative mechanism for cell-to-cell propagation in cardiac muscle and smooth muscle (Sperelakis), 64
Propagation of electrical activity in gastrointestinal smooth muscle: the case for propagation by local circuit current flow (Bortoff), 57
Rat colonic motor responses to inflammatory mediators in vitro: a poor model for the human colon (Percy et al), 229
Myenteric plexus
5-Hydroxytryptamine-mediated responses in myenteric neurons of the guinea pig gastric corpus: effect of ICS 205-930 and cisapride (Schemann), 255
Myoelectric complex, migrating
Activity fronts of migrating myoelectric complex: initiation by luminal bile acids in rat small intestine (Nilsson et al), 84
Gastrointestinal electrical activity in the prairie dog during fasting, feeding, and after high-cholesterol diet (Calabuig and Moody), 117
Migrating motor complex and the enterohepatic circulation of bile acids: a scintigraphic study using ^{75}Se-HCAT (Qvist et al), 1
Response of the human gastrointestinal tract to erythromycin (Zara et al), 26
Role of peptide YY in intestinal and gallbladder motility in dogs (Thor et al), 237
Studies of small intestinal myoelectrical activity and intraluminal pressure changes in the unrestrained conscious rat (Arouni et al), 12

Neural conduction
Cell-to-cell conduction across gap junctions can account for electrical syncytial properties of gastrointestinal muscle (Wood), 55 (Editorial)
Electric field model: an alternative mechanism for cell-to-cell propagation in cardiac muscle and smooth muscle (Sperelakis), 64
Neurons
5-Hydroxytryptamine-mediated responses in myenteric neurons of the guinea pig gastric corpus: effect of ICS 205-930 and cisapride (Schemann), 255
Neurons, afferent
Capsaicin-sensitive vagal afferent fibers and gastric motility: evidence for an "axon reflex" mechanism (Laird et al), 138
Neurotensin
Effects of neurotensin on gastric smooth muscle of dog and guinea pig (Mandrek and Milenov), 5
Nucleotides, cyclic
Change in intracellular cyclic nucleotide content accompanies relaxation of the isolated canine internal anal sphincter (Grous et al), 46

Paraplegia
Double-blind controlled trial on the

effect of cisapride in the treatment of constipation in paraplegic patients (Badiali et al), 263
Effect of electrical anterior sacral nerve root stimulation on pelvic floor function in paraplegic subjects (Binnie et al), 39
Parkinson disease
Esophageal manometry in patients with unilateral hemispheric cerebrovascular accidents or idiopathic Parkinsonism (Weber et al), 98
Pelvis
Effect of electrical anterior sacral nerve root stimulation on pelvic floor function in paraplegic subjects (Binnie et al), 39
Peptides
Role of peptide YY in intestinal and gallbladder motility in dogs (Thor et al), 237
Peristalsis
Effect of cold stress on esophageal peristalsis in healthy humans during the postprandial period (Penagini et al), 163
Phentolamine
Adrenergic control of interdigestive and digestive motility via the pyloric region (Holle et al), 131
Role of peptide YY in intestinal and gallbladder motility in dogs (Thor et al), 237
Postoperative complications
Abdominal surgery- and trephination-induced delay in gastric emptying is prevented by intracisternal injection of CRF antagonist in the rat (Taché et al), 19
Potassium
Barrier kinetic mapping unit: application to ionic transport in gastric smooth muscle (Skinner and Bardakjian), 213
Prostaglandins
Effects of neurotensin on gastric smooth muscle of dog and guinea pig (Mandrek and Milenov), 5
Rat colonic motor responses to inflammatory mediators in vitro: a poor model for the human colon (Percy et al), 229
Pseudo-obstruction syndrome. *See* **Intestinal obstruction**
Psychological stress. *See* **Stress**
Pylorus
Adrenergic control of interdigestive and digestive motility via the pyloric region (Holle et al), 131
Radionuclide imaging
Migrating motor complex and the enterohepatic circulation of bile acids: a scintigraphic study using ^{75}Se-HCAT (Qvist et al), 1
Ritodrine
Colonic and cardiovascular actions of the atypical β-adrenergic agonist SR 58611A in rats (Croci et al), 273
Sacral nerve
Effect of electrical anterior sacral nerve root stimulation on pelvic floor function in paraplegic subjects (Binnie et al), 39
Scintigraphy. *See* **Radionuclide imaging**
^{75}Se-HCAT. *See* **Radionuclide imaging**
Serotonin
5-Hydroxytryptamine-mediated responses in myenteric neurons of the guinea pig gastric corpus: effect of ICS 205-930 and cisapride (Schemann), 255
Small intestine. *See* **Intestine, small**
Smooth muscle. *See* **Muscles, smooth**
SR 58611A
Colonic and cardiovascular actions of the atypical β-adrenergic agonist SR 58611A in rats (Croci et al), 273
Stomach
5-Hydroxytryptamine-mediated responses in myenteric neurons of the guinea pig gastric corpus: effect of ICS 205-930 and cisapride (Schemann), 255
Regulation of gastric corpus tone by the vagus nerve in the ferret (Grundy et al), 32
Relationship between clinical factors and gastrointestinal dysmotility in diabetes mellitus (Kim et al), 268
Stress and gastrointestinal motility in humans: a review of the literature (Holtmann and Enck), 245
Stress
Effect of cold stress on esophageal peristalsis in healthy humans during the postprandial period (Penagini et al), 163
Effects of cold stress on gastric myoelectric activity (Stern et al), 225
Stress and gastrointestinal motility in humans: a review of the literature (Holtmann and Enck), 245
Trephining
Abdominal surgery- and trephination-induced delay in gastric emptying is prevented by intracisternal injection of CRF antagonist in the rat (Taché et al), 19
Vagotomy
Regulation of gastric corpus tone by the vagus nerve in the ferret (Grundy et al), 32
Vagus nerve
Capsaicin-sensitive vagal afferent fibers and gastric motility: evidence for an "axon reflex" mechanism (Laird et al), 138
Regulation of gastric corpus tone by the vagus nerve in the ferret (Grundy et al), 32
